E11 Solutions is seeking equity investment.

Available Documents: Business Profile

06 PROJECT TITLE: BIZTECH

Location: [Kingston](#)

Summary

BizTech is an online peer to peer lending platform that connects borrowers with individuals serving as lenders. With a core focus of financial inclusion, BizTech allows users to connect either through mobile and web applications that are easy to follow and less onerous than traditional financial institutions. BizTech does this all while maintaining Know-your-customer and Anti-money laundering requirements for a lending institution. The easy-to-use platform is targeted at individuals and small businesses seeking non-traditional sources of financing in a timely manner.

BizTech is seeking a mix of debt financing and equity investment to expand its business through intense marketing and promotion.

EDUCATION SERVICES PROJECTS

The **University of the Commonwealth Caribbean (UCC)** is the largest private tertiary education institution in Jamaica. The UCC has campuses across Jamaica in five parishes, offering courses from professional certificates to doctoral degree programmes including programmes in collaboration with the University of London.

As part of its thrust to expand its student base and provide professional services to corporate accounts, the UCC has developed a suite of projects to pursue these ends.

University Town

The University Town project is designed as a service export to attract international students to Jamaica. This “Global Campus” offers a cultural immersion programme and student exchange programme to incentivize overseas students interested in studying in Jamaica. In addition to providing English as a second language (ESL), online study programs and an international franchise to widen the UCC’s reach.

EDUCATION SERVICES PROJECTS

International Franchise

The UCC Collaborative Education Provision is the vehicle through which it is propelling an international franchise in the Commonwealth, Caribbean and Africa. The UCC is targeting innovative entrepreneurs and businesses with an interest in designing custom training and education opportunities through brick and mortar university or online learning platforms.

Early College and Advanced Placement High School Programme

The UCC through partnership with the Ministry of Education, Youth and Information is offering associate degree programmes to students at High Schools across Jamaica. The Early College and Advanced Placement High School Programme allows students at the 10th and 11th grades to gain credits towards higher level education. The programme can equip up to 7,500 students annually across Jamaica.

The Morant Bay Urban Centre

The UCC is expanding its footprint into the East of Jamaica with a university campus in the parish and extension of its outsourcing business (Global Knowledge Processing Solutions). The proposed 75,000 sq. ft. facility will allow the university to leverage its existing expertise in outsourcing backed by its reputation to produce quality talent.

Digital Animation Skills Training

Animation is fast becoming the medium of choice for communicating messages in advertising, television and film. The UCC is positioning itself to upskill 100 students in a 2-year animation skills training programme targeting youth from vulnerable communities. Operating as a social impact project, the data gathered from the exercise will be used for research and development of other programmes.

The UCC is pursuing equity investment, partnerships and joint venture agreements in its projects.
